- taxonomical purpose 26:27
- taxonomy 28:177
- telencephalon 28:187
- thyrotrophin releasing hormone 25:95
- topoisomerase II 26:77
 - cloning and characterization 26:77
- transcallosal evoked responses 28:105
- transducin 28:291
- transgenic 28:141
- transplantable tumors 28:227
- transposon mutagenesis 27:233
- Triatoma infestans* hindgut 26:279
- triglycerides 25:27
- triose phosphate isomerase 29:101
- trypanocide activity 25:21
- Trypanosoma cruzi* 26:3, 26:11, 26:19, 26:27, 26:35, 26: 41, 26:47, 26:65, 26:81, 26:101, 26:109, 26:151, 26:167, 26:189, 26; 197, 26:209, 27:225, 26:257, 26:273, 26:279, 26:285, 26:313, 26:315
- adenyl cyclase 26:279

- biological properties 26:315
- cell differentiation 26:35
- characterization 26:167
- clonal structure 26:167
- epidemiological significance 26:47
- GTPase genes 26:3
- glycosylphosphatidylinositol 26:285
- guanine nucleotide binding proteins 26:177
- heat shock proteins 26:313
- histone H2B 26:41
- HSP60 gen 26:313
- HSP60 and HSP70 proteins 26: 313
- immunosuppression 26:197
- intermediary metabolism 26:81
- major cysteine proteinase 26:101
- metacyclic forms 26:19
- metacyclic trypomastigotes 26:313
- phospholipases 26:285
- population genetics 26:27
- population structures 26:47
- protein N-glycosylation 26:69
- ribosomal P proteins 26:273
- topoisomerase II 26:77
- Trypanosoma rangeli* 26:27
- trypanosomatids 26:69
- trypanosomes 26:219
- trypomastigotes 26:315
- tumor
 - growth enhancement 28:227
 - necrosis 26:233
- urinary bladder 27:123
- uterotrophic placental factor 26:381
- uvomorulin 26:501
- vascular reactivity 27:209
- vertebrates 27:15; 29:313
- virulence factors 28:205
- visual
 - cortex 28:73, 28:211, 28:219
